

4 Things That Set FLEX Teleradiology Apart for Mobile Imaging Companies

*Tired of your mobile radiology company taking a backseat to fixed sites?
At FLEX, your success is our #1 focus.*

Many mobile diagnostic companies aren't getting the attention they deserve because of:

- High provider costs
- Poor patient positioning
- Low quality equipment
- Lack of attention and training

But great patient care can be achieved in a mobile setting with attentive, focused support.

As a company solely dedicated to providing accurate reads for mobile imaging, we are aware that you are starving for attention. Our goal is to customize our offered services to meet the needs of your organization, and our attentive staff utilizes a proprietary teleradiology platform to deliver top quality mobile diagnostic reads to you 24/7.

4 Reasons FLEX Teleradiology is Superior for Mobile Imaging

1. WE CARE ABOUT YOUR SUCCESS

Mobile radiology can be a tough industry. Your fixed-site competition often has access to better equipment, better technicians, and better patient care. Our team of caring experts understands that you need more support than your competition. We are sensitive to your challenges as a mobile company, and we know that image accuracy depends on many things you can't control, such as:

- Patient positioning
- Reliability of equipment
- Skill of technicians
- Constraints in time and location

FLEX can turn mobile radiology into reliable radiology.

We are just as invested in your patients as you are, and we are here to offer you all the tools you need to ensure you have the most up-to-date techniques to get the best images possible.

2. WE GET ENGAGED

Mobile images can often be hard to read, and that can have life-impacting results for the patient.

If it's not right, we'll tell you! But don't take that the wrong way—it's because we care. FLEX turns every read into a teaching moment.

Imagine a baseball coach who sits in the dugout reading the newspaper while his team throws the ball around. Now imagine a coach who goes out on the field, makes necessary corrections, gives examples, and expects his team to win. Which team do you think will be more successful?

Letting you know how to get a better image is paramount to producing quality results, and we're not afraid to say it. Teaming up with FLEX means you'll have a dedicated coach every step of the way. Your company will be set up to compete with fixed sites in quality, accuracy, and turnover time—all resulting in better patient care.

3. WE LOVE ATTENTION

Giving it, that is.

Capturing a great image takes skill, even in the most ideal situations. Add the complexity of immobile patients and close quarters, and you need experts who are willing to go the extra mile to support you.

Poor images happen, but FLEX won't let your company settle for less than the best. We take it upon our shoulders to offer advice to help you get the images you need so your patients can get the care they need. We are here for you, so you can be there for your patients.

FLEX provides unmatched support so you can get unmatched results.

4. WE WANT YOU TO PAY LESS

No one wants to pay for what they don't need, so why use a teleradiology company that charges for services you aren't using? Fixed-site radiology can cost a fortune because doctors are staffed around the clock, but mobile imaging has the cost advantage of only utilizing doctors per study.

With FLEX you pay for the services you need, not the services someone else is getting.

We staff only the doctors we need, to do the studies that are ordered. You pay a fraction of the cost with mobile radiology, and with FLEX you won't sacrifice any of the quality.

Together, we can change the image of mobile imaging.
